CAREER OBJECTIVE:

Backend-focused developer with foundational knowledge in Java, Python, SQL, and backend system development. Interested in building reliable backend applications, understanding system architecture, and developing scalable data-driven solutions. Seeking opportunities to apply programming skills, improve problem-solving ability, and grow as a software engineer while contributing to real-world backend systems.

EDUCATION

B.Tech Artificial Intelligence and Data Science

JUNE 2020 - May 2024

Sri Venkateswaraa College OF Technology

CGPA : 7.95

TECHNICAL SKILLS

Programming Skills:

- Java (OOP, Collections Framework (List, Set, Map), Control Structures, Exception Handling, File Handling)
- Python (basic scripting, logic building)
- SQL (Queries, Joins, Subqueries, Aggregations)

Backend & Concepts

- REST API fundamentals
- WebSocket (real-time communication, broadcast patterns)
- Client–Server architecture

Tools

- Git (basic version control)
 - VS Code
 - Debugging & basic testing
-

PROJECTS

Real-Time WebSocket Broadcast System (Concept Project)

Python, FastAPI, WebSockets

- Developed a simple real-time messaging project to understand WebSocket communication.
- Implemented one admin client sending messages and multiple user clients receiving them.
- Learned how live connections work and how messages are delivered only to connected clients.
- Gained hands-on experience in handling connections, disconnections, and basic message flow.
- Project focused on learning concepts rather than production-level design.

Store Billing System

Python

- Developed a basic store billing application using Python.
 - Implemented functionality to add items, calculate total bill amount, and generate simple bills.
 - Worked with basic data structures to store product details and prices.
 - Focused on understanding program flow, logic building, and user input handling.
 - Project helped in practicing real-world problem solving using simple coding concepts.
-

EXPERIENCE

Software Developer Intern — Lentera Technologies

Nov 2023 – Jan 2024

- Worked on the internal project 'Ticketzee' by writing basic code, fixing small issues, and testing features.
- Supported the team in simple development tasks and learned project workflow, debugging, and version control.
- Gained exposure to problem-solving and understanding how systems behave during development and testing.

Program Analyst Intern — KultureHire

DEC 2024 – Jun 2025

- Assisted in creating program flows and validating end-to-end logic.
- Contributed to workflow testing, issue identification, and documentation.
- Improved coordination, communication skills, and process understanding through team collaboration.

Software Developer Intern — Netphenix

Nov 2025 - Jan 2026

- Learned the fundamentals of Python programming during internship training.
- Practiced core programming concepts such as variables, conditions, loops, functions, and basic scripting.
- Completed multiple small coding exercises to strengthen logical thinking and problem-solving skills.
- Gained experience in reading, executing, and understanding existing Python codebases.
- Developed basic debugging and troubleshooting skills while working on practice tasks.

Backend Engineer Intern — Zenfinity Energy

Jan 2026

- Contributing to backend development tasks involving data processing and pipeline workflows.

- Working with backend systems to collect, process, and manage operational data.
 - Assisting in building and maintaining data pipelines to support internal applications.
 - Writing and maintaining backend scripts for data handling and system integration.
 - Collaborating with the development team to improve system reliability and backend performance.
-

POSITIONS OF RESPONSIBILITY & ACHIEVEMENTS

Sports Team Captain – College Sports Division

- Led the college sports team during practices and inter-department events.
- Gained experience in teamwork, coordination, and maintaining discipline.

Sports Achievements

- Powerlifting – Inter-College: Overall Gold , State Level: 1st Gold
 - Bodybuilding – State Level (TABBA) Junior Category 1st place , District Level (TABBA) 2nd Place(Silver)
-

ADDITIONAL INFORMATION

- **Languages:** English, Tamil, Japanese (N5 – Pursuing)
- **Certifications:** Currently pursuing Java Full Stack training at QSpiders
- **Strengths:** Quick learner, disciplined, adaptable, good communication, problem-solving mindset
- **Interests:** Backend development, system design, real-time systems, learning new technologies
